GRIN Verlag Mrz 2013, 2013. sonst. Bücher. Book Condition: Neu. 216x75x2 mm. This item is printed on demand - Print on Demand Neuware - Essay from the year 2011 in the subject Psychology - General, grade: 1,6, University College Cork, language: English, abstract: Charles Darwin (1809-1882)1 was the first person who explained an evolutionary theory and the transmutations of species by natural selection and fitness. He stated that character traits are passing from one generation to another. But he didn't explain how this took place. This is where Gregor Mendel (1822-1884)2 appears on the scene. He conducted research with pea plants and made genetical experiments. He was one of the major pioneers handling with genetics. In the main Mendel figured out that two different types of genes do exist. I will go more into depth under the chapters 2.2 and 3.2 Theories. In the following these themes about genetics and how we humans and every creature on this earth are receiving our characteristics, is what I want to single out during this essay. 20 pp. English.
